

Welcome to the Vladkon Buyers Club!

We are a young and rapidly developing brand that respects each of its customers and considers product quality a top priority. For the production of our conservation we use only wild fish that grows in natural conditions and carefully check each supplier. At the moment we are working with more than 40 fish suppliers around the world. Each batch of raw materials undergoes strict quality control by our team of specialists. You will not find any additives and preservatives in our products.

Our team is 300 people - professionals from different spheres. We produce nearly 4 million cans per month and we have 5 full-cycle production lines. We are represented in 80 regions of our country and work with huge national and international networks such as: Magnit, Krasnoye & Beloye, Perekrestok, VkusVill, Auchan, METRO and many others. Our assortment has almost 30 items including exclusive for Russian market tuna and salmon pates and sea salad.

We thank everyone who is already working with us and is a member of our closed club.

We hope that every year the number of our partners will multiply and we will continue to work on the development of the assortment and new recipes so that our product can always be a standard of quality and impeccable taste.

And remember: The seas are conquered by the well-fed only!

*Yours respectfully,  
Serdyukov Vladimir Sergeevich  
Chief Executive Officer*
